

Blueprint Topic Team Status Report

The Blueprint Rollout Topic Team is responsible for integrating the other Topic Teams' input into a cohesive document for the Governor to consider in the form of a blueprint report. In order to leverage the expertise of the volunteers in this Topic Team, subgroups were formed to address production methods, end-use applications of hydrogen, potential site locations, and commercialization strategies. Each of the subgroups are addressing the technology readiness, industry readiness, costs, and requirements for successful deployment of hydrogen technologies in relation to Phase I (now), Phase II (up to 2010), and Phase III (post 2010).

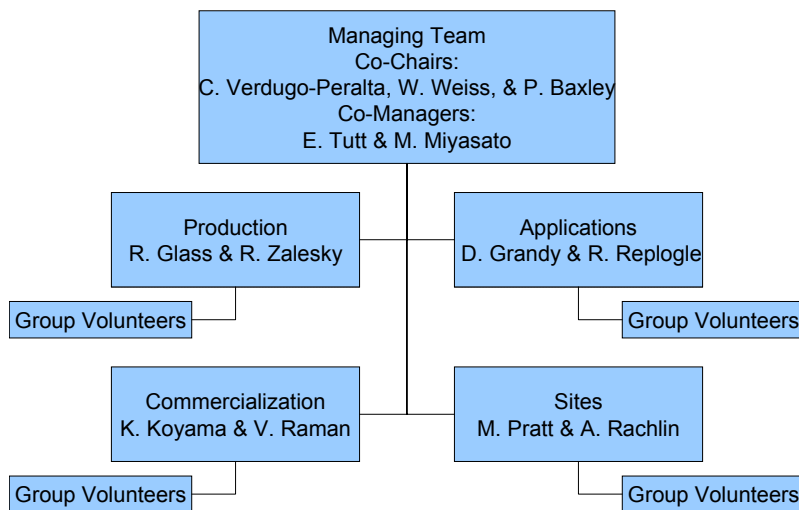

The subgroup are being led by the following volunteers:

Production: Bob Glass (LNLL) and Rick Zalesky (ChevronTexaco)

Applications: Doug Grandy (DGS) and Bill Repogle (Sandia)

Sites: Mitch Pratt (CleanEnergy) and Aaron Rachlin (Praxair)

Commercialization: Ken Koyama (CEC) and Venki Raman (Protium)

Blueprint Topic Team, Core Group Structure

The subgroups have been working toward developing their input with the goal of providing draft information by the end of August 2004 for the co-chairs to review and present to the Advisory Panel.
